

# ABHIK MAHAJAN

Web Developer  
Software Engineer  
Student

## PROFILE

Motivated and detail-oriented web and software development student with a strong foundation in coding, problem-solving, and software design. Passionate about building innovative and functional applications, I enjoy tackling complex challenges and creating efficient solutions. With hands-on experience in various development tools and technologies, I am eager to contribute my technical skills to meaningful projects and expand my knowledge in the field.

## PROJECTS

### Food Ordering Website (Frontend)

APRIL'2024

Collaborated in a team of three to develop a responsive food ordering website, handling the frontend design and implementation. Focused on creating an intuitive user interface, optimizing page layouts, and enhancing the user experience for easy navigation and efficient order placement

### Tic Tac Toe Game

OCT'2024

Developed a console-based Tic-Tac-Toe game in C++ that allows two players to compete. Implemented game logic for player turns, board updates, and win/draw conditions. Designed a simple user interface for intuitive gameplay.
